LIBRARY
WEST AMERICAN SCIENTIST

West * American * Scientist

A popular monthly review and record for the Pacific Coast.

Official organ San Diego Society of Natural History.

Established 1884.

CONTENTS:

Sea-urchins of the Pacific coast.	73
Review of the Cactaceae of the United States.—V.	57
Queries and Answers.	72
Author's Catalog.	71
West American Mollusca.—III.	74
Editorial.	70
Notes and News.	70

San Diego, California:

Number 365 Twenty-first street.

Charles Russell Orcutt Editor and Publisher.

Price 10 cents; \$1 a year; \$10 for Life.

ADVERTISEMENTS.

WEST AMERICAN SCIENTIST: 365 Twenty-first St.,
San Diego, Ca. if.

Established 1884 by Charles Russell Orcutt, Editor and
Publisher. Price 10 cents a copy, \$1.00 a year (twelve con-
secutive numbers), \$10.00 for life. Back numbers (when avail-
able) 20 cents a copy, numbers 1-12, 20-33, 60, and others,
wanted.

LIFE SUBSCRIBERS.

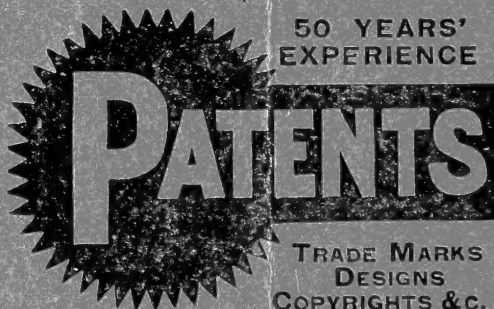

By the payment of ten dollars at one time the WEST
AMERICAN SCIENTIST will be sent to any address during
the life of the subscriber, or as long as published. The editor
expects to publish throughout his lifetime, and hopes to create
a permanent fund that will ensure the continued life of the maga-
zine.

STONE, CHARLES E.: Spencer, Mass.

NELL, PHILIP: 878 Marshal St., Philadelphia, Pa.

COOKE, MISS J. M.: 1045 Fifth St., San Diego, California.

50 YEARS'
EXPERIENCE

TRADE MARKS
DESIGNS
COPYRIGHTS & C.

Anyone sending a sketch and description may
quickly ascertain our opinion free whether an
invention is probably patentable. Communica-
tions strictly confidential. Handbook on Patents
sent free. Oldest agency for securing patents.

Patents taken through Munn & Co. receive
special notice, without charge, in the

Scientific American.

A handsomely illustrated weekly. Largest cir-
culation of any scientific journal. Terms, \$3 a
year; four months, \$1. Sold by all newsdealers.

MUNN & Co. 361 Broadway, New York

Branch Office, 625 F St., Washington, D. C.

SANITARIAN, THE: 337 Clinton St., Brook'yn, N. Y.

A monthly magazine, established in 1873, based at the out-
set upon medical knowledge and sanitary service, over an ex-
tensive field of observation in various climates, large experience
in dealing with epidemic diseases, and practical sanitation for
the maintenance of health under the most trying circumstances.
Two volumes a year; \$4 in advance, 35c a number (sample copy
20c.—10 2c stamps). Dr. A. N. Bell, editor.

August, 1900.

Whole No. 92.

SEA-URCHINS OF THE PACIFIC COAST.

These beautiful animals seem to have received slight attention, as the following is about all the information that I find.

I—Regular sea-urchins.

ARBACIA NIGRA, credited to west coast.

A. STELLATA Gray, collected at San Juan, in the Gulf of California, by the writer, No. 1772 (1899).

ASTROPYGA PULVINATA, credited to Lower California and Central America, described as having flesh-colored spines.

DIADEMA MEXICANUS A. Ag. San Diego, south.

HIPPONOE DEPRESSA, San Diego, Gulf of Cal.

STRONGYLOCENTROTUS FRANCISCANUS occurs at San Diego, south; often a foot in diameter, including spines.

S. MEXICANUS of the Gulf of California I have not seen.

S. PURPURASCENS is the common San Diego purple urchin.

II—Cake-urchins.

CLYPEASTER ROTUNDAS, San Diego, south.

ECHINARACHNIUS EXCENTRICUS Val.

This common species is abundant from Oregon to Mexico; a form from Santo Domingo, Lower California (Orcutt No. 2552) is quite different from the 'sand dollars' of San Diego, and we are inclined to consider it distinct.

ENCOPE CALIFORNICA Verrill.

Orcutt No. 2551: Santo Domingo, Lower California.

E. GRANDIS, Gulf of California.

III—Irregular sea-urchins.

AGASSIZIA SCROBICULATA, western Mexico.

BRISSUS OBESUS Verrill. Gulf of Cal.—Orcutt.

LOYENIA CORDIFORMIS, Pt. Conception to Mexico.

RHYNCOPYGUS PACIFICUS, western Mexico.

We will be pleased to learn of any additions that can be made to this short list.

C. R. ORCUTT.

WEST AMERICAN MOLLUSCA.—IV.

SHELLS OF LAGOON HEAD.

The following list is the result of two or three days spent in the latter part of February, 1899, mostly spent in botanizing. No rocky beach was visited, all the living shells being collected in the lagoon, nearly due east of Cedrus Island, the landing being known locally as Santo Domingo. It is near the 28th degree north lat. on the west coast of Baja California, a few miles north of Scammons lagoon. Species not found living are marked d.

The letter e indicates species observed in the kitchen middens or shell heaps on the sand dunes near the lagoon, probably of Indian origin—but possibly in part of more recent origin; species marked ee were probably collected attached to other shells and not sought for food; Pinna and Avicula were doubtless sought by pearl fishers.

In one of these heaps was found a stone cylinder, perforated, undoubtedly of Indian origin, which was sent to the American museum of natural history, with several thousand other specimens on approval in exchange for books—which they now refuse to send and likewise refuse to return the specimens—compelling us to make a forced donation, a species of wholesale robbery, founded originally we suspect on a misunderstanding, but so far the museum officers concerned have shown no trace of honor.

Purpura biserialis Blainv.

Found living a few miles north of San Diego was seen only in beach worn specimens; observed abundant at San Juan and other points in the Gulf of California.

Chorus belcheri Hinds. d

Ranella californica Hinds. d abundant.

Macron æthiops Reeve. Not rare. e

Nassa tegula Reeve. Abundant.

Myurella simplex Cpr. Not rare.

Drillia—? d ee

Conus californicus Hinds. d ee

Cypræa spadicea Gray.

Several fine examples were collected by the pearl fishers who were in the lagoon at the time of my visit.

Neverita reclusiana Reeve.

Apparently as abundant as formerly in San Diego bay. e

- Polynices uber* Valenciennes. One living specimen found.
Crucibulum spinosum Sowerby. Abundant. ee
C. imbricatum Lam. Orcutt No. 1751. d ee
Crepidula unguiformis Lamarck. One collected.
C. dorsata Brod. Found on shells collected by the pearl divers.
C. rugosa Nuttall. Abundant. ee
Litorina scutulata Gould. Abundant.
L. planaxis Nuttall. d rare.
Cerithidea sacrata Gould. ? d rare.
Barleeia subtenuis Cpr. Extremely abundant on sea-grass.
Truncatella californica Pfeiffer. Not rare.
T. stimpsoni Stearns. Very common.
Pomaulax undosus Wood. d e common.
Omphalius aureotinctus Forbes. One seen, d.

Haliotis cracherodii Leach.

To the north of Lagoon Head, at 'Santa Rosalia,' on the west coast, hundred of sacks of this species were loaded on the steamer during my trip. e

H. splendens Reeve

The pearl fishers had only two or three.

H. corrugata Gray.

The pearl fishers had collected about two dozen fine typical shells of this species.

Fissurella volcano Reeve. d

F. violacea, one specimen, d.

Lucapina crenulata Sowerby. e

Acmæa patina Esch. Rare.

A. spectrum Nuttall. Few small ones seen.

Lottia gigantea Gray. e common.

Cylichna inculta Gould. d

Bulla nebulosa Gould. Not rare.

Hamina vesicula Gould. Abundant.

H. virescens Sowerby. d abundant.

Melampus olivaceus Carpenter. d ee abundant.

Pedipes unisulcata Carpenter. Abundant.

Zirphœa crispata L. d

Pholis—? d

Solen rosaceus Gould. Beautiful and large, $2\frac{3}{4}$ inches long.

Tagelus californianus Conrad. Abundant.

<i>Cryptomya californica</i> Conr.	d	
<i>Clidophora punctata</i> Gabb.	d	one specimen.
<i>Semele decisa</i> Conr.	d	
<i>Lyonsia californica</i> Conr.	d	common.
<i>Periploma argentaria</i> Conr.	d	
<i>Sanguinolaria nuttallii</i> Conr.		A fine series obtained.
<i>Tellina rubescens</i> Hanl.		One fine specimen obtained.
<i>T. variegata</i> Cpr.	d	not rare.
<i>Heterodonax bimaculatus</i> D'Orb.	d	common.
<i>Macoma indentata</i> Cpr.		Abundant.
<i>Donax californicus</i> Conr.	d	common.
<i>D. flexuosus</i> Gould.		Few fine ones obtained.
<i>Venus fluctifraga</i> Sowerby.		One distorted specimen. e
<i>V. succincta</i> Val.		Large and abundant. e
<i>Tivela crassatelloides</i> Conr.	d	not abundant?
<i>T. radiata</i> Sowerby.		Not common?
<i>Amiantis callosa</i> Conr.		Abundant. d
<i>Cytherea chionæa</i> Mke.	e	edible, not abundant.
<i>Tapes staminea</i> Conr.	d	
<i>Cardium procerum</i> Sby.		
<i>Liocardium elatum</i> Sby.		
<i>L. substriatum</i> Conr.		
<i>Chama exogyra</i> Conr.	d	
<i>Arca multicostata</i> Sby.	e	not rare, edible.
<i>Mytilus californianus</i> Conr.	d	e
<i>Modiola capax</i> Conr.	d	
<i>Septifer bifurcatus</i> Reeve.		
<i>Pinna lanceolata</i> Sby.	d	e
<i>Avicula peruviana</i> Reeve.		Found abundant by pearl fishers. e
<i>Pecten subnodosus</i> Sby.	d	e
<i>P. monotimeris</i> Conr.	d	rare.
<i>P. æquisulcatus</i> Conr.	e	extremely abundant.
<i>Anomia lampe</i> Gray.		

Thousands of fine specimens were found, attached to each other, or to other shells, bits of wreckage, etc. Found also at Guaymas, in the Gulf.

Ostrea lurida Cpr. ee common.

Labiosa (Ræta) undulata Gould. d

Dosinia ponderosa Gray. e edible, common.

To be concluded.

SUPPLEMENT (not for preservation).

QUERIES AND ANSWERS.

W G Watkins—Your ferns are

- 1—*Adiantum pedatum* L.—Maiden Hair fern.
- 2—*Aspidium nevadense* Eaton.
- 3—*Lomaria spicant* Desvaux.

EDITORIAL.

The editor's illness has abbreviated and delayed this issue but we propose to give our readers a yearly average of not less than 16 pages a month.

NOTES AND NEWS.

It should be noted that *Epiphragmophora Harperi* was named in honor of Prof. George W. Harper, for nearly half a century devoted to educational work in Cincinnati, and until lately principal of Woodward High School—having resigned that position to devote his time more fully to scientific research; geology and conchology are his specialties.

Epiphragmophora Bowersi was named in honor of Dr. Stephen A. Bowers, a veteran in scientific and other good work on the Pacific coast, now state mine examiner for California.

Mrs. Olive L. Eddy Orcutt M. D. has opened an office for the practice of medicine at 365 21st St., San Diego.

AUTHOR'S CATALOG.

Stone, Alaric: My summer with some chipmunks. Ladies home journal, Philadelphia, for Ag is a pleasing nature study.

EXCHANGES.

We have a fine collection of first class sea shells, all beauties, valued at \$25, to exchange for a printing press, not smaller than $4\frac{1}{2} \times 7\frac{1}{2}$ inches. N S & c company New Kamilche Wash.

West American Seed Co.
